## Rosa Coplon Living Center – Outdoor Visitation Fact Sheet

Per Department of Health (DOH) guidelines, family members are allowed to take a resident outside, weather permitting, if the resident is fully vaccinated. Fully vaccinated means it has been two weeks since the final dose of the COVID-19 vaccine. Per DOH guidelines, residents who are not fully vaccinated may not be taken outside.

When the facility is not experiencing a COVID-19 outbreak, visitors must go straight to the resident's room and then straight outside - visitors may not travel within the facility. Visits can take place only in the resident's room or outside and cannot be conducted in common spaces. If you choose to take a resident outside, please follow these steps:

- Visitors must go directly to their loved one's room.
- If you'd like to have your visit outdoors, please inform the nurse on your loved one's unit.
- The nurse will confirm the resident has been fully vaccinated and offer a face mask to the resident.
- Masks must be worn at all times by all parties.
- There can only be one resident in the elevator at a time.
- Everyone must stay socially distant from others at all times throughout the visit - while traveling through the facility and to the outside.
- Visitors must escort their loved one outside, and back to their room at the end of their visit.
